Vehicle (make/model/year)

Instructions:

Thank you for entrusting your gauges to us. We will contact you when they arrive.

Please make sure that your gauges are protected in shipping and that they cannot bounce around inside the shipping container as this is how most breakage occurs. Also please make sure that the pointers/needles are protected.

International customers:

Please make certain that your shipment is marked as REPAIR. If it is incorrectly marked on your documents you will incur import duties which will be based on your declared value.
